Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-20, drawn to use a set of information at a desired fuzziness level to produce first and second values/versions for comparison, classified in class 706, subclass 1.
 - II. Claims 21-46, drawn to use hash value of procedure/code/data for comparison, classified in class 707, subclass 200.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as not using a hash value in the system to compare two version programs. Invention II has separate utility such as not using an artificial intelligence in the system to compare two version programs. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification; and the search required for Group I is not required for Group II; and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 2122

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
